

# Polishing & Deburring Kit

A variety kit that includes CM, OX, and Diamond types.

## 【Features】

### ■ 「CM Type」 #80 / #120 / #220

- A long-selling type that is suitable for the general materials as well as Aluminum, SUS and nickel alloy. Grinding is sharply and polishing is softly.
- Prevents secondary burrs and brings effective work.

### ■ 「OX Type」 #320

- Suitable for polishing work. \*More efficient using with CM Type.
- Also suitable for surface finishing without causing scratches.

### ■ 「Diamond Type」 #1000/ #3000

- Suitable for mirror finishing especially on SUS, carbide and material for hardening.
- No need of post-processing like Diamond paste.
- Both wet and dry processing are possible.
